Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, will not be published elsewhere in the same form, in English, without the written consent of the Publisher. The Editors reserve the right to edit or otherwise alter all contributions, but authors will receive proofs for approval before publication.

All manuscripts should be prepared in MS-Word format, and submitted on CD. If you have any questions, please contact with the editor of the journal in Scientific Association of Animal Health Research Institute, Animal Health Research Institute, Dokki.

Paper Selection and Publication Process

a) Peer review. The journal uses double-blind system for peer-review; both reviewers and authors' identities remain anonymous. The paper will be peer-reviewed by three experts; two reviewers from outside and one editor from the journal typically involve in reviewing a submission. The review process may take 2-3 weeks.

b) Notification of the result of review by senior author himself or by E-mail.

d) The authors revise paper and pay the publication 500 L.E. per paper with maximum 10 pages.

e) The corresponding author will receive five copies of printed journals, free of charge. If you want to keep more copies, please contact with the editor before making an order.

f) E-journal in PDF available at Editor Office.

General

Language

Please write your text in good English (American or British usage is accepted, but not a mixture of both); decimal points (not commas); use a 1½ space. We only accept manuscripts in English language.

Length of paper

3000-8000 words are preferred.

Title Page

Title page is a separated page before the text. Provide the following information on the title page (in the order given). It should include:

Title

Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.

Author's names and affiliations

Please indicate the given name and family name clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name, and, if available, the e-mail address, and telephone number of each author.

Corresponding author

Clearly indicate who is willing to handle correspondence at all stages of refereeing, publication and also post-publication. Ensure that telephone numbers are provided in addition to the e-mail address.

Sponsoring information

If the research is sponsored or supported by an organization, please indicate it.

General Rules for Text

Please use the following rules for whole text, including abstract, keywords, heading and references.

Front: Times New Roman; Size: 12

Paragraph Spacing: Above paragraph – 0 pt; Below paragraph – 4 pt

Line Spacing: fixed – 12 pt (1½ line).

Heading 1: Times New Roman; Size-12; Bold; for example, **1. Introduction**

Heading 2: Times New Roman; Size-12; Italic; for example, *1.1 Research Methods*

Heading 3: Times New Roman; Size-12; for example, 1.1.1 Analysis Result

Preparation of text

Abstract

A concise and factual abstract is required (maximum length of 150 words). The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separate from the article, so it must be able to stand alone. References should therefore be avoided, but if essential, they must be cited in full, without reference to the reference list.

Keywords

Immediately after the abstract, provide a maximum of 8 keywords, avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible.

Subdivision of the article

Divide your article into clearly defined and numbered sections. Subsections could be numbered 1, 2,   (then 1.1, 1.1.1, 1.1.2), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text.' Any subsection, ideally, should not be more than 600 words. Authors are urged to write as concisely as possible, but not at the expense of clarity.

Figure legends, figures, schemes

Present these, in this order, at the end of the article. They are described in more detail below. High-resolution graphics files must always be provided separate from the main text file.

Tables

Present tables, at the end of the article. Number tables consecutively in accordance with their appearance in the text. Place description to tables below the table body. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

Formula

The text size of formula should be similar with Times New Roman, Font 12 size.

References

Responsibility for the accuracy of bibliographic citations lies entirely with the authors.

Citations in the text

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Avoid citation in the abstract. Unpublished results and personal communications should not be in the reference list, but may be mentioned in the text. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Citing and listing of web references

As a minimum, the full URL should be given. Any further information, if known (author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Note:

a). Please present the Tables and Figures must be embedded in paper.

b). Please avoid using footnotes. Change footnotes to endnotes. Insert "(Note 1, Note 2)" in normal text, and explain the note after References. Please see the "Template".

c). Please do not use any colors more than white and black in paper. The layout of paper is only in white and black.
